

AIA/CES Registered Provider Program Summary

Provider Name: Curecrete Distribution

Program Title: Drafting an Understanding of Polished Concrete (AFP2)

Length: 1 hour **Credits:** 1 LU (Learning Units) **HSW:** Yes (Yes or No)

GBCI Credits: No

Program Overview:

This course you will understand the benefits and limitations of polished concrete and to recognize how specifications influence the outcome. Environments and industries conducive to polished concrete will be discussed.

Learning Objectives:

1. Identify the challenges, disadvantages of using floor coatings and membranes as opposed to chemical densifiers. Identify the advantages of using chemical densifiers over floor coatings and membranes.
2. Identify the added benefits that polishing can add to densified concrete and the low life cycle cost factor when compared to other types of flooring materials and coverings such as tile, terrazzo, etc.
3. Densified polished concrete
4. Learn how the process of concrete densification eliminates the need for additional applications, and can enhance the overall performance of concrete for the life of the floors, when using the right chemical densifier product.

Facilitator Qualifications:

Curecrete Distribution manufacturer's representative.

Method of Delivery: Powerpoint presentation

Audio/Visual required: Powerpoint projector

Cost to participants: 0

Point of Contact:

Justine Johnson / Vernon Talbot / Mark Trunnell
