

AIA/CES Registered Provider Program Summary

Provider Name: Curecrete Distribution

Program Title: Drafting an Understanding of Densified Concrete (CDI03)

Length: 1 hour **Credits:** 1 LU (Learning Units) **HSW:** Yes (Yes or No)

GBCI Credits: No

Program Overview:

This course will provide an understanding of the benefits and limitations of chemically densified and hardened concrete. It also includes a discussion on how chemical densifiers work, how they were specified, and in which types of buildings they are most appropriate. It also includes information on the environmentally friendly properties of chemical densifiers, and how they promote worker safety. Information on coast and long-term maintenance is also reviewed.

Learning Objectives:

1. Explain the densifying process and differentiate it from traditional floor coatings.
2. Understand the properties of chemical densifiers, and how they work.
3. Differentiate among methods of densifying.
4. Identify the sustainable attributes of concrete in terms of materials, indoor air quality, and energy savings and how this can contribute to earning LEED certification.
5. Identify the benefits of densified concrete floors in terms of design, maintenance, energy savings, and occupant health.

Facilitator Qualifications:

Curecrete Distribution manufacturer's representative.

Method of Delivery: Powerpoint presentation

Audio/Visual required: Powerpoint projector

Cost to participants: 0
